

EPSOM SALTS NO LONGER A DRUG IN THE MARKET

Now Sold as a Commodity and
Ordered by the Hundred
Pounds at a Time.

DOES IT TAKE OFF FAT?

Belief That It Does Has Created
a Boom in the Artificial
Water of Epsom.

Belief that bathing in a solution of Epsom salts will reduce obesity has caused an unusual flurry in the salt market, according to the manager of one of the largest string of retail drug stores in New York. He said yesterday that within the past few weeks many orders have been received from the obese, the near obese and those who fear that they are heading obesity for Epsom salts in units of a hundred pounds.

"And the funny part of it is," the manager went on, "that a lot of the women most of the orders come from that sex, and what I would call just about right. I suppose they may be guarding against the future, but for the life of me I can't see why they don't leave well enough alone."

"Seriously, I don't know just what the merits of Epsom salts baths for reducing obesity may be," he continued, "but I do know that there is a great demand for salts, that is, in my experience, particularly in the uptown section. I believe it is generally supposed that the secret method by which a famous operative singer reduced her weight was taking these baths, but I have as yet not met anybody who could tell me just what authority there is for the belief."

Dr. Simon Baruch of 51 West Seventy-third street, professor of hydrotherapy at the Columbia University Medical School, says he does not believe there is any particular virtue in Epsom salts baths which cannot be derived from ordinary hot baths, which induce perspiration.

"Measures for reducing superfluous flesh have been in vogue for about a century. The first scientific systematic scheme for getting rid of corpulence to be set forth in the English language was the well-known Banting system, which was prescribed by an educated physician and which proved successful not only in winning the object but in accomplishing it without damage, in fact with improvement of the patient's health."

"Thousands of people have tried the Banting system, some with advantage, but a majority with unpleasant or dangerous results. This goes to prove that no system of reduction applicable to all cases. Likewise, the use of Epsom salts in a large majority of cases. You go to a druggist who gives you a headache powder which relieves you temporarily. Then you consult a physician and he investigates your case, finds the probable cause, gives you no medicine and you are cured."

"If you reason from the immediate gratifying effect of the druggist's powder you may prescribe it for a friend who may obtain permanent relief because his case differs from yours. So it is with the vaunted sure cures for obesity. Some cases are temporarily relieved, some are permanently benefited because they have been advised by a physician who is not an anti-fat doctor, but whose constitution or studies your heredity, your past and present mode of life and lay down a course of diet, hygiene, baths, which reduces your weight without impairing your general health. On the other hand, if you buy one of the anti-fat remedies, some of which are very dangerous, you may through good fortune be forced by illness to consult your doctor."

"The doctor explained that salts used internally naturally reduce the weight. They act by drawing water from the blood in the intestinal canal. But the blood vessels in the skin are small and there are no arteries in the skin. He believes that hot baths taken frequently are injurious, since the blood vessels are dilated, the muscles are relaxed and the heart is obliged to pump more water, sometimes to the detriment of the heart. He believes that any fat person can reduce his weight by dieting. Each should consult his family physician."

Asked why policemen become fat, Dr. Baruch said that they have every inducement. The average policeman, even if not on fixed pay, walks no further than five miles a day, he said. His existence is varied and interesting. He is not worried about his job. He is sufficiently paid, and he has a plenty of wholesome food. "In fact, there is no man whose occupation is more conducive to obesity than the policeman's," he said, and he added, "I would scarcely recommend a man troubled with obesity to become a policeman. Neither would I advise a fat letter carrier to exercise in order to reduce his weight."

REBELS CAPTURE GEN. BLANCO?

Washington Hears Casas Grandes Is
In Insurrecto's Hands.

WASHINGTON, Dec. 24.—The State Department to-day received an unconfirmed report of the capture of Gen. Blanco and his Federal troops by Mexican insurgents and the capture of the town of Casas Grandes by the rebels. Gen. Siverio at El Paso is seeking to ascertain the correctness of these reports.

A band of 200 insurgents has burned the town of Guatimape, six miles north of Durango. Several railroad bridges in the vicinity were also destroyed.

Mr. Morris, employed by the Northern Railway Company, has reached his home following a tour by insurgents. He reports that he was well treated by his captors.

The strike at Cananea Mines has been settled. No further danger to Americans is apprehended.

Files Away to Avoid Arrest.

VICKSBURG, Miss., Dec. 24.—When a policeman went to-day to the Hotel Carroll to serve a warrant charging violation of the prohibition laws on D. B. Young, manager of the hotel, he learned that Young had actually fled away by train for St. Louis and is said to have left six miles north of here and boarded a train for St. Louis.

Requisition papers for his return from Missouri or Illinois were issued by Gov. Brewer.

Plans One Gun of Murder.

BRIDGEPORT, Conn., Dec. 24.—The jury in the Criminal Superior Court this afternoon found Chicago Jimmy Buono guilty of murder in the first degree. He was accused of killing James Cavaleri near Stamford this fall. James Risco, Frank Risco and James Risco were charged with being implicated in the murder, were acquitted.

A M. Funk of Cleveland, Ohio, shot and killed his wife in hotel at Galveston, Tex., yesterday and attempted to end his own life. He may die.

The Pennsylvania Railroad Company yesterday notified the State Commission that in the future, blind persons capable of getting about without aid will be permitted to travel over its lines unaccompanied.

WILL CONFER ON ALIEN INSADE.

U. S. to Be Asked to Relieve States of Burden.

ALBANY, Dec. 24.—Various States have accepted an invitation from the State of New York to attend a meeting to be called later to discuss legislation to be suggested to Congress with a view of relieving the States of the burden of caring for insane immigrants. The meeting is being arranged by Dr. Spencer L. Davies of Albany, who was appointed last March by Gov. Dix to make a special investigation of the alien insane.

The following States have agreed to send representatives: Maine, New Hampshire, Vermont, Connecticut, Massachusetts, Pennsylvania, New Jersey, Maryland, West Virginia, Tennessee, Kentucky, South Carolina, Indiana and Illinois.

"Since appointment Dr. Davies has held numerous hearings at the various State hospitals and in Albany and New York," said Gov. Dix to-night. "Some idea of the burden undertaken by this State may be had from the fact that the Legislature of 1913 will be asked to appropriate \$11,792,704 for the insane, an increase of \$3,422,318 over the amount required in 1912. The average cost of maintenance for each patient in our State hospitals exceeds \$250 per annum, and as there are thousands of alien insane patients, we begin to realize the annual cost of these unfortunates to taxpayers. As the average hospital life of the insane patient is probably upward of ten years, the total cost of maintenance runs into millions."

"The Federal Government decides who shall enter this country, but makes practically no provisions for the care of those who become incapacitated. Moreover, the United States alone has the right to deport the insane. It would seem fair that if the Federal Government is to control admission and return, it and not the States should foot the bills for the care of the mental defectives."

"During the fiscal year ended September 30 last the State of New York returned to foreign countries through the United States immigration service and its own efforts 1,171 insane, as against 784 in the previous year, and against 582 insane, as against 342, a total of 1,753 for 1912, as against a total of 1,126 for 1911, an increase of 55.7 per cent."

Dr. Simon Baruch of 51 West Seventy-third street, professor of hydrotherapy at the Columbia University Medical School, says he does not believe there is any particular virtue in Epsom salts baths which cannot be derived from ordinary hot baths, which induce perspiration.

"Measures for reducing superfluous flesh have been in vogue for about a century. The first scientific systematic scheme for getting rid of corpulence to be set forth in the English language was the well-known Banting system, which was prescribed by an educated physician and which proved successful not only in winning the object but in accomplishing it without damage, in fact with improvement of the patient's health."

"Thousands of people have tried the Banting system, some with advantage, but a majority with unpleasant or dangerous results. This goes to prove that no system of reduction applicable to all cases. Likewise, the use of Epsom salts in a large majority of cases. You go to a druggist who gives you a headache powder which relieves you temporarily. Then you consult a physician and he investigates your case, finds the probable cause, gives you no medicine and you are cured."

"If you reason from the immediate gratifying effect of the druggist's powder you may prescribe it for a friend who may obtain permanent relief because his case differs from yours. So it is with the vaunted sure cures for obesity. Some cases are temporarily relieved, some are permanently benefited because they have been advised by a physician who is not an anti-fat doctor, but whose constitution or studies your heredity, your past and present mode of life and lay down a course of diet, hygiene, baths, which reduces your weight without impairing your general health. On the other hand, if you buy one of the anti-fat remedies, some of which are very dangerous, you may through good fortune be forced by illness to consult your doctor."

"The doctor explained that salts used internally naturally reduce the weight. They act by drawing water from the blood in the intestinal canal. But the blood vessels in the skin are small and there are no arteries in the skin. He believes that hot baths taken frequently are injurious, since the blood vessels are dilated, the muscles are relaxed and the heart is obliged to pump more water, sometimes to the detriment of the heart. He believes that any fat person can reduce his weight by dieting. Each should consult his family physician."

Asked why policemen become fat, Dr. Baruch said that they have every inducement. The average policeman, even if not on fixed pay, walks no further than five miles a day, he said. His existence is varied and interesting. He is not worried about his job. He is sufficiently paid, and he has a plenty of wholesome food. "In fact, there is no man whose occupation is more conducive to obesity than the policeman's," he said, and he added, "I would scarcely recommend a man troubled with obesity to become a policeman. Neither would I advise a fat letter carrier to exercise in order to reduce his weight."

WASHINGTON, Dec. 24.—Hattie May Tugman, wife of the late Hattie May Tugman, who was killed in the explosion of the ship "Hattie" in the harbor of New York, yesterday afternoon, was found by a jury of the Supreme Court to be insane and was committed to the State Hospital for the Insane.

SCHWAB AND GARY USED IN HAWTHORNE BOOSTS

Trial Reveals That Steel Men's
Names Were Embroidered in
Circulars.

CONTRADICTED BY EXPERT

Claims Made in Banker's Letter
Shown by Examination to
Be Overstated.

That Julian Hawthorne in one of his Canadian mine boosting circulars made adroit use of the names of both Charles M. Schwab, president of the Bethlehem Steel Company, and Judge Gary of the United States Steel Corporation was shown yesterday at the trial of Hawthorne, ex-Mayor Josiah Quincy, Dr. William Morton and Albert Freeman.

The names of the steel men were embroidered in a circular introduced as evidence by Assistant United States Attorney Dorr. It opens with a long letter written to Hawthorne by George J. Seay, a banker, of Richmond, Va.

Now it is a question of two things—quantity and quality. Accessibility we have, and as to the value, if you will let Mr. Schwab, president of the Bethlehem Steel Company, and Judge Gary of the United States Steel Corporation testify, both of these being buyers of ore lands, you may be satisfied to take their valuation.

As to value, Mr. Schwab testified that they have for some time been using ore which runs 48 per cent, because the higher quality is not procurable. He testified that the average ore then being brought down by the Steel Corporation from the Superior region was 49 per cent.

Mr. Schwab valued the ore of his company at \$1 a ton in the ground, and that too when they had to pay a royalty to take it out.

Mr. Carnegie paid a tribute to Mr. Schwab's astuteness in acquiring ore properties in Canada. Well, that is some distance away, and the analysis, according to our Geological Survey, is not up to the Wilbur ore.

The testimony given by John William Astley, a mining expert, afforded a striking contrast to the opinions expressed by Seay as to the value of the ore in the Wilbur mine.

Astley, who was employed by the Exploration Syndicate, an adjunct of the Hawthorne Silver and Iron Mines, Limited, to inspect the Wilbur mine, said a woman from being burned to death and then went back into the flames and rescued her two children. The woman is in St. Francis Hospital, in Jersey City, in a serious condition. The two children were not injured.

Mrs. Gertrude Miller, wife of Capt. William Miller of the Barre, Vt., who was killed in the explosion of the ship "Hattie" in the harbor of New York, yesterday afternoon, was found by a jury of the Supreme Court to be insane and was committed to the State Hospital for the Insane.

MRS. WILSON PICKS MISS HAGNER

Social Secretary of Other Admin-
istrations Engaged for Next.

WASHINGTON, Dec. 24.—The announcement of the appointment of Miss Isabelle H. Hagner as social secretary to Mrs. Woodrow Wilson was favorably received to-day. Miss Hagner was secretary to Mrs. Roosevelt and acted in a similar capacity for Mrs. Taft until she was transferred to the State Department. She is a daughter of Dr. Charles E. Hagner, who some years ago was one of the prominent physicians of Washington. Her uncle is Judge Alexander B. Hagner of the District Supreme Court, now retired. Miss Hagner became acquainted with Mrs. Roosevelt when she was a member of Mrs. Roosevelt's Sunday school class at St. John's Episcopal Church while Col. Roosevelt was serving as Civil Service Commissioner.
